EDUCATION

Austin Peay State University, Clarksville, Tennessee. Ongoing, **4.0 GPA**. Placed on Dean's List.

Volunteer State Community College, Gallatin, Tennessee. Graduated Summa Cum Laude with a **4.0 GPA** and placed on Dean's List with Honors each semester.

Relevant Coursework: Introduction to Programming I & II (Java), Web Development (HTML/CSS), Programming and Logic (Python)

KEY SKILLS

Programming Languages:

Java · Python · JavaScript · Swift · C++ · Kotlin

Web:

HTML · CSS

Frameworks:

Tailwind · ReactJS · TypedJS · Java Swing

Tech:

Git · Visual Studio Code · XCode · Vite · Selenium · Axios · Twilio · PyCharm · NetBeans · Google Cloud Platform

EXPERIENCE

January 2021 – February 2021

Freelance Web Developer • Alliance Training & Testing

Efficient and effective communication, completed tasks promptly and efficiently, worked as a small team in which I delegated tasks and helped a team member debug. **HTML/CSS** and **JavaScript** were used to accomplish the task of modernizing a business's website. (Link)

April 2022 – May 2022

Freelance Cloud Developer • Alliance Training & Testing

Cloud Developer duties such as: hosted a business's website on Google Cloud Platform and created an HTTPS Load Balancer, HTTP to HTTPS redirect, SFTP server, CDN, backup servers (cloud instances), and created and securely stored an SSL certificate and key.

PROJECTS

Portfolio Website

- Built a responsive website using **React**, **Tailwind**, and **TypedJS** with a modern and intuitive design to display my projects and growth. I used **Vite** to quickly build and bundle the application code. I then used **Git** for version control and deployed it using GitHub Pages. (Website) (GitHub)

iOS Weather App

- Used **Swift** to create a weather app for iOS. Implemented the OpenWeather API to get a user's location and provide real time weather data. (GitHub)

GUI Study Timer

- Developed a graphical user interface for a 90-minute study timer using **Java** and **Java Swing**, implementing 10-second breaks every 5 minutes, as recommended by Dr. Andrew Huberman, neuroscientist and associate professor at Stanford University. (GitHub)

Facebook Web Scraper

- Wrote a **Python** script using the Selenium API, Chrome Webdriver, and Twilio API to help automate the process of getting a Golden Retriever puppy. This script refreshes the webpage of a select breeder of Golden Retrievers every five minutes, and when a post mentioning puppies, birth, or pregnancy is made, the Twilio API sends a text mentioning the respective keyword. (GitHub)

Interests: music, powerlifting, electric and autonomous cars, football, AI/ML
